Corporate Background

- Titan Wood Limited was formed on April 17th 2003 by Accsys Technologies PLC
- From 2003 – 2006 technology development and design of a large scale production plant
- 2006 – 2007 construction of the plant
- 2007 production commenced
- This is the world's first plant producing acetylated wood on large scale at a commercially viable cost

Acetylation process

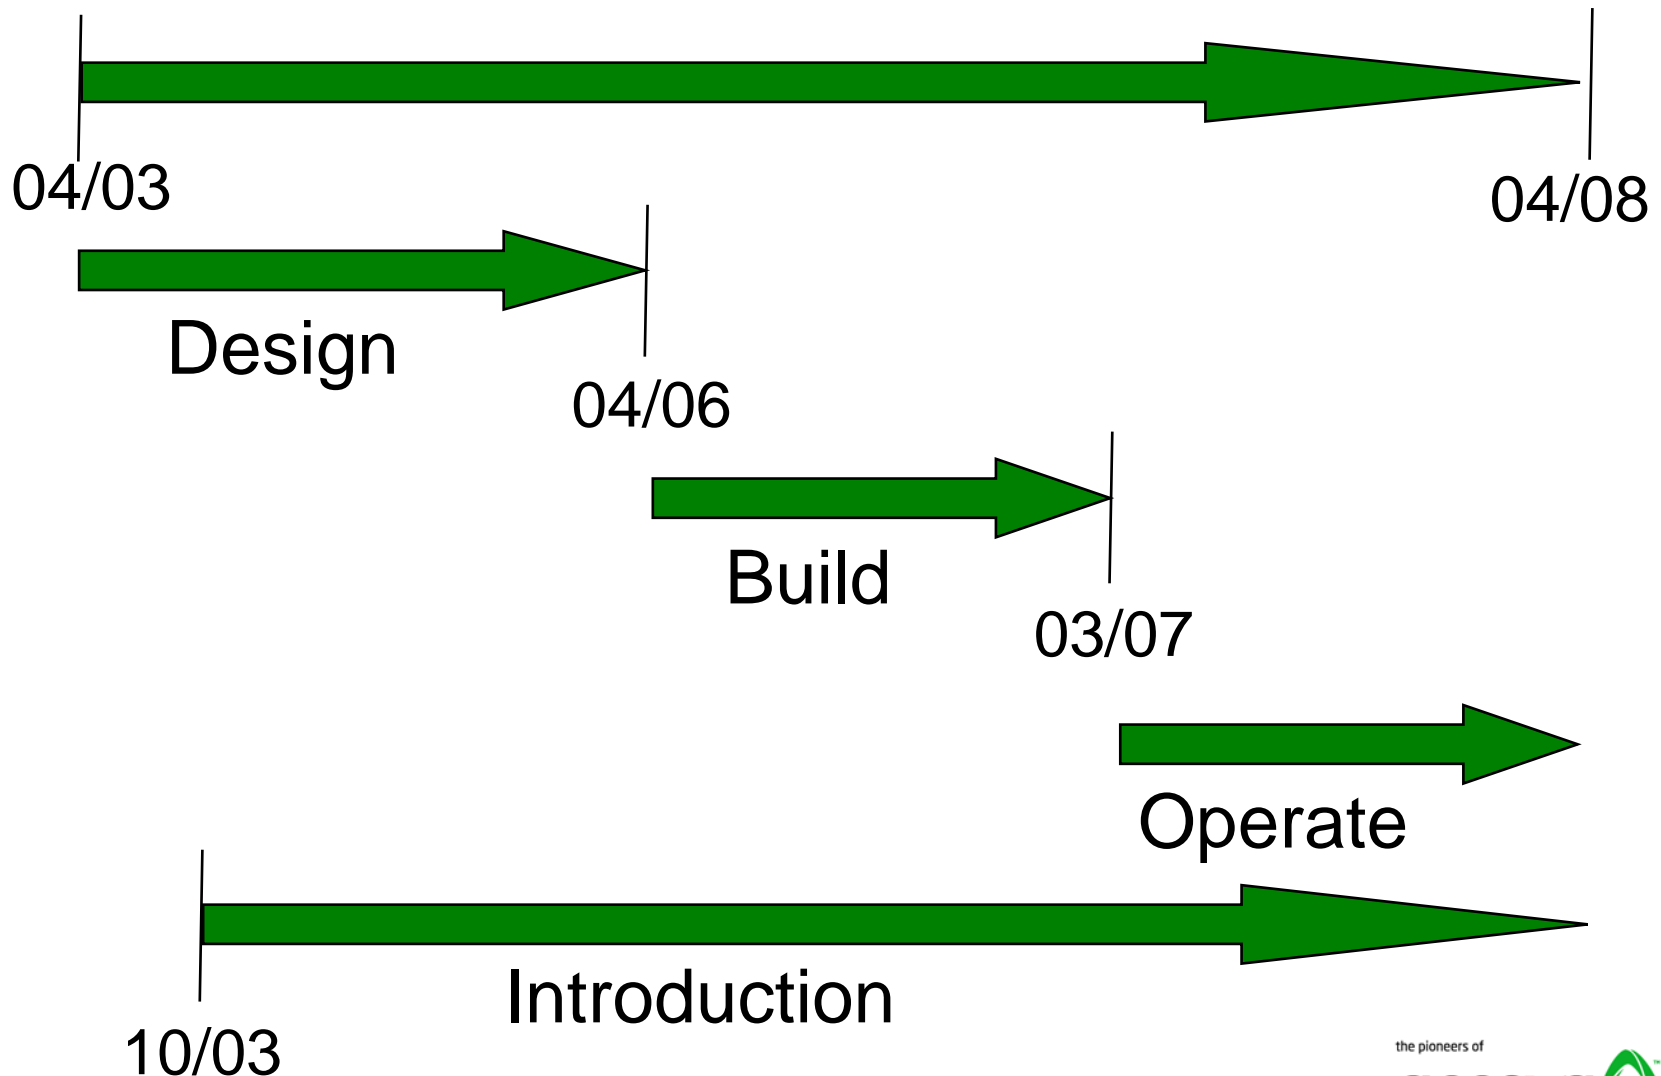

TITAN
WOOD

Time frame for commercialisation

TITAN
WOOD

Path to success

- Certification of process
- Certification of product

No European standard for wood modification!

Acetylation is 'new in the industry'

Example; durability

Quality assured

Durability

TITAN
WOOD

- 1800 samples in EN 113
- Low up to high acetyl
- What acetyl % is needed to reach durability class 1 with most aggressive fungi
- Same for ENV 807

Resistentie klasse 1

Resistentie klasse 1

UV stability

TITAN
WOOD

Path to success

TITAN
WOOD

- Have small core group of customers
- Involvement of branche related companies such as coating and glue producers
- Run testprograms upfront commercial stage
- Work together to optimize end-quality
- Guidance and support
- Monitor building sides
- Evaluate projects with the parties involved
